Daniel Wambua

havocxsec@proton.me | Nairobi, Kenya | https://github.com/Daniel-wambua

Cybersecurity-focused Information Technology student with hands-on experience in penetration testing labs, CTF competitions, and security tooling. Strong interest in offensive security, vulnerability assessment, and security operations. Actively seeking a job offer or position in technology/security.

Experience

Team Wallz

RECRUITED TEAM MEMBER | CTF COLLABORATION — *February 2026 – October 2026*

- Recruited to join Team Wallz (https://ctftime.org/team/397301)
- Actively collaborating with teammates on CTF challenge solving and writeups
- Team profile and updates: https://w4llz.me/

51l3nt_br34ch CTF Team

CTF TEAM MEMBER | OFFENSIVE SECURITY PRACTICE — *July 2025 – Present*

- Solved web, network, and basic binary exploitation challenges in team-based CTFs
- Practiced vulnerability discovery using Burp Suite, Nmap, and manual testing techniques
- Collaborated on writeups and shared methodologies for common vulnerability classes
- Team profile and updates: https://silent-breach.github.io/51l3nt_br34ch/

Karatina University

IT STUDENT | INNOVATION CLUB MEMBER — *August 2023 – Present*

- Supported organization of beginner-friendly CTF competitions and technical demos
- Assisted peers with Linux usage, networking concepts, and basic security tooling
- Participated in cybersecurity awareness sessions and hands-on labs

Education

Karatina University

BACHELOR OF SCIENCE (BSC) IN INFORMATION TECHNOLOGY — GRADE: ONGOING — *2023 – 2027*

I-Tech Computer College

CERTIFICATE IN COMPUTER FUNDAMENTALS & SECURITY OPERATIONS — GRADE: DISTINCTION — *August 2022 – January 2023*

Skills

Cybersecurity & Offensive Security	Web App Testing, Network Pentesting, Vuln Assessment, OWASP Top 10
Security Tools	Burp Suite, Nmap, Metasploit (Basics), Wireshark, Linux CLI
Programming & Scripting	Python, Bash, JavaScript, Go (Basics)
Systems & Platforms	Linux (Parrot/Ubuntu), Git & GitHub, Docker (Basics), Cloud (Vercel/Netlify)
Documentation & Research	CTF Writeups, Tech Docs, Security Research

Achievements

- **1st Place** - Jengase × NCBA Loop × Hack The Box × Strathmore University 2026 Red Team Hackathon (Team Pwners)
- **Top 10 Finalist (6th Place)** - CyberGame Kenya 2026
- **3rd Place - Connected Africa Summit 2026 CTF** (Team JOINT, Karatina University)
- **Top 10 Finalist** - CyberGame Kenya 2025

Awards

CyberGame Kenya - Top 10 Finalist, 6th Place (2026) - Ranked 6th among the top ten finalists in CyberGame Kenya 2026, a national-level cybersecurity competition recognizing Kenya's best practical security talent.

Connected Africa Summit 2026 CTF - 3rd Position (May 2026) - Achieved 3rd place in the Connected Africa Summit 2026 Capture The Flag competition as part of Team JOINT from Karatina University. Demonstrated advanced skills in vulnerability assessment, exploitation techniques, and collaborative problem-solving under competitive conditions.

CyberGame Kenya - Top 10 Finalist (2025) - Recognized for strong performance in national-level cybersecurity competition focused on practical skills

Projects

BlackBook MCP (1 ★) Live — Daniel-wambua/BlackBook
Read-only, source-grounded cybersecurity knowledge MCP server: hybrid FTS5 and semantic retrieval, a knowledge graph, and exact citations from HackTricks, 0xdf, and PDF corpora

CTF Writeups & Security Blog (21 ★) Live — Daniel-wambua/blog
Personal blog documenting CTF solutions, tooling notes, and security concepts

Cyberhub (3 ★) Live — Daniel-wambua/cyberhub
A curated living, automated knowledge base for cybersecurity professional

MacOS_Portfolio (10 ★) Live — Daniel-wambua/MacOS_Portfolio
Personal portfolio project demonstrating frontend skills and deployment workflows
